## Professional Development

### Mentoring new faculty members

The scientific department has a special complementary approach to the faculty guidance strategy through the vision statement, mission, and goals of the college. The department does not follow up on personnel affairs properly for the executive staff and is able to self-control.

### Professional development of faculty members

One of the axioms of the scientific department in the professional development of college members is to set a schedule specifying training courses and workshops in addition to seminars, all of which would increase the professional ability and quality of the college members.

## 12. Acceptance Criterion

Through the private admission and central admission channels.

## 13. The most important sources of information about the program

- Market needs.
- the Guidance of the governorate.
- Scientific studies.

#### 14. Program Development Plan

##### Teaching staff

- Contributing to developing the competence of teaching staff in the department in a way that is compatible with the development of the humanities
- Contributing to providing universities, colleges and various institutions with academically qualified graduates who hold master's and doctorate degrees.

##### Educated people

- Paying attention to providing learning opportunities and acquired experiences that develop students' capabilities and orientations.
- Using new concepts in the field of al-sharia sciences and using electronic devices to present information and issues when necessary.
